DETAILED ACTION

This action is in response to applicant's response on 1/13/2004, which has been placed in the electronic file.

Allowable Subject Matter

Claims 6, 8, 13-16 and 18-20 are allowed.

In brief, the reasons for allowance are that previously objected-to claims 6, 8 and 18 have been rewritten in independent form including all of the limitations of the base claim and any intervening claims, and a subsequent search did not teach or render obvious the claimed subject matter.

The reasons for allowance have been conveyed in the action mailed 12/17/2004. They are summarized below.

The nearest relevant prior art of record, Hu et al. (US 5,867,584), teaches object tracking in successive frames taken as input to a camera (entire document). In locating an object, Hu et al. evaluates candidate regions in a kind of decoding process to determine if an object is located in the candidate region. For the candidate regions where an object might be located in a succeeding frame, test windows are chosen based on the location of the object in a previous frame (see especially column 8, lines 34-41 and 45-

50; see also column 2, lines 49-58 and column 8, lines 30-50), and where the objects are roughly expected to be based on position in previous frames.

Hu fails to teach that the first and second regions, between which a selection is made based on which region corresponds to a same region as in a most recently decoded image, are different in resolution, the use of separate lenses, or in focal distance.

Indeed Hu uses a single camera to compare various regions, and thus different regions in the same frame of an image by the same camera would necessarily have to be the same in terms of resolution, lens usage and focal distance.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
